

Public Reporting of Outcomes 2016

The Genesis Cancer Care Institute, Genesis Medical Center, Davenport, Iowa is an American College of Surgeon's Commission on Cancer (CoC) accredited program. The CoC is dedicated to improving cancer care and the outcome of care. The CoC requires accredited cancer programs to treat cancer patients according to nationally accepted quality improvement measures indicated by the CoC quality reporting tool, Cancer Program Practice Profile Reports (CP³R).

Standard 4.4 and 4.5 Quality Improvement measures CP³R require estimated performance measures (EPR) levels are met yearly for each quality improvement and accountability defined by the CoC specified accountability and quality improvement. Quality Improvement and some Accountability measures are set at 80-90% by the CoC. Data reported is for 2013 and 2014.

The Genesis Cancer Committee a multidisciplinary committee monitors the EPR measures and addresses measures that are not within compliance. Any of the measures below the EPR rate are evaluated how processes can be improved based on evidence based guidelines. Genesis is exceeding or meeting all required performance measures.

Rapid Quality Reporting System (RQRS):

Genesis Medical Center started reporting RQRS to the National Cancer Database (NCDB) in 2012. RQRS is a reporting and quality improvement tool which provides real clinical time assessment of hospital level adherence to quality of cancer care measures. RQRS is a reporting system that advances evidenced-base treatment through a prospective alert system for anticipated care which supports care coordination required for breast and colorectal cancer patients at participating cancer programs.

Use of RQRS has shown the data collection and reporting system positively impacts and promotes the quality of care for breast and colorectal cancer patients.

Cancer Program Practice Profile Reports CP³R 2013 & 2014 comparison data

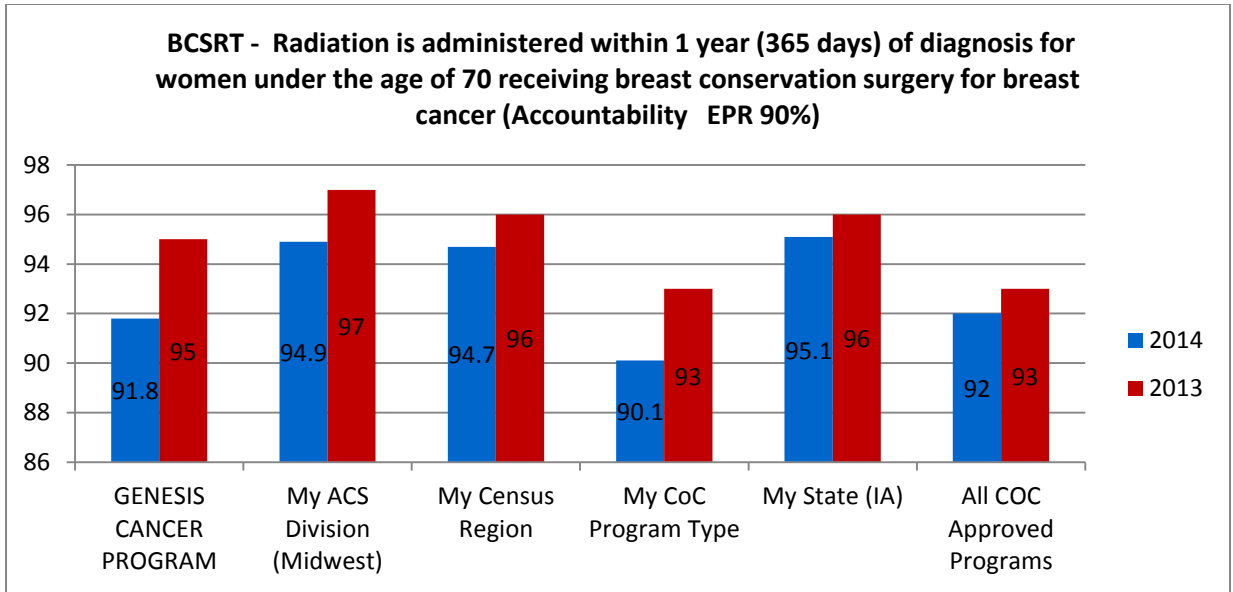

BREAST MEASURES:

Genesis is above the 90% CoC accountability measure

Genesis is above the 90% CoC accountability measure

Genesis is within the 95% confidence interval. Accountability CoC is 90%. Genesis is 89.8%

Genesis is above the 80% Quality Improvement measure.

COLON MEASURES:

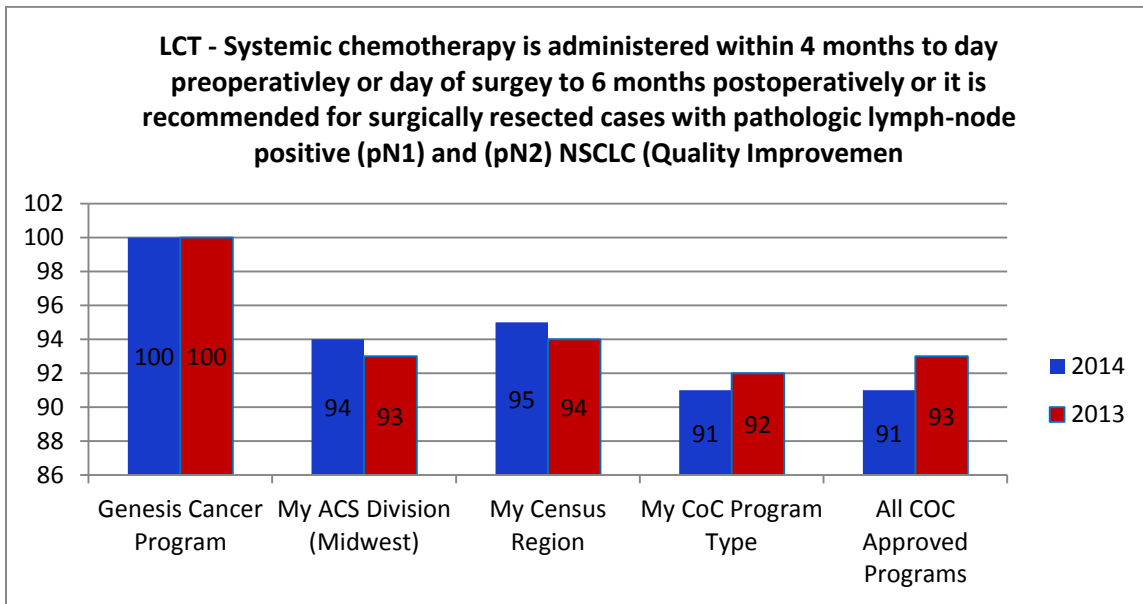

Genesis is within the 95% confidence interval. Accountability CoC is 90%

Genesis is above the 90% Quality Improvement measure.

LUNG MEASURES:

Genesis is above the 90% Quality Improvement measure.

Genesis is above the 90% Quality Improvement measure
