MyGENESIS

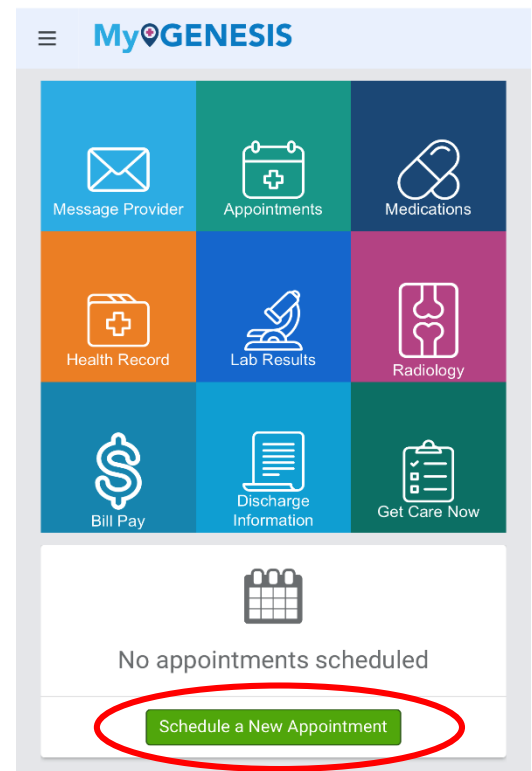

Instructions to schedule a COVID Vaccination Appointment

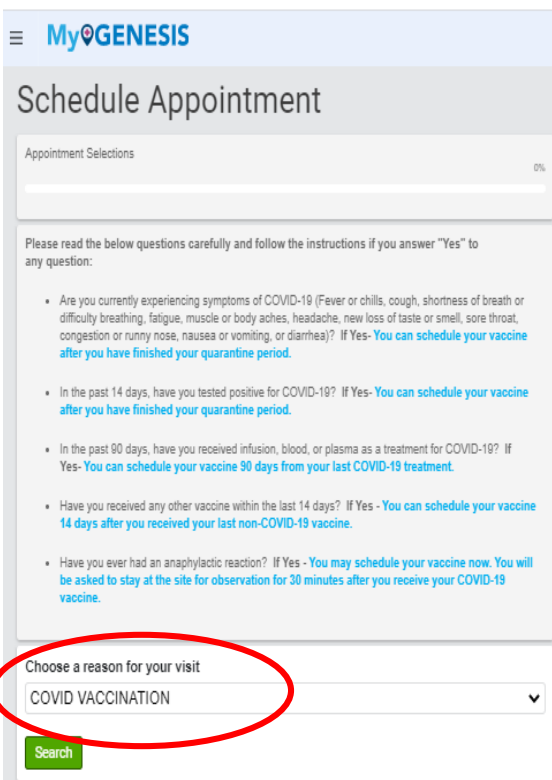

1. Log on to your MyGenesis patient portal account

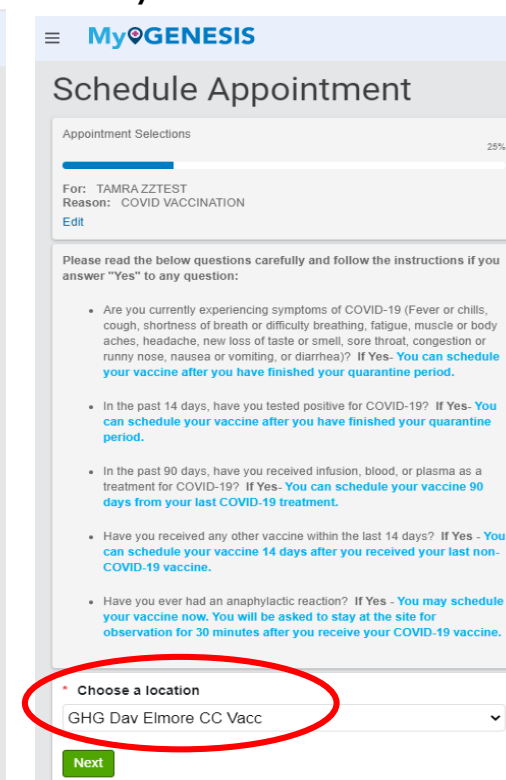

2. Select schedule a new appointment

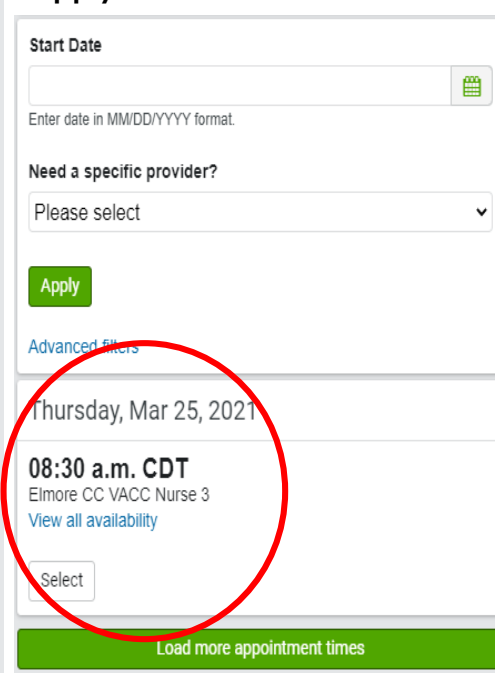

3. Read thru screening questions and select reason for your visit: COVID VACCINATION. Click Search

4. Choose your location and select "View All Appointments". Patients should receive vaccination in the state they reside. Click Next.

5. All available appointments will pop up. Click select on the appointment you want. If no appointments show up, then there are no appointments left for the week based on the supply of vaccine received.

COVID VACCINATION

Thursday, Mar 25, 2021
08:30 a.m. CDT

For: TAMRA ZZTEST
With: Elmore CC VACC Nurse 3

GHG Dav Elmore CC Vacc

Edit

Describe any specific requests or special needs you want us to consider in preparation for your visit.

Send me an email with my appointment details

If a follow-up regarding your appointment is needed, MyGenesis Health Record will contact you using a secure message.

Schedule Appointment

If you are unable to make your appointment, please call 24 hours in advance by emailing VaccineCancel@genesishealth.com

This is important so we can schedule someone else for their vaccine.

7. Confirmation of your appointment will display. You are also provided instructions to prepare for your vaccination appointment on this screen. You can also view these instructions on our website at www.genesishealth.com/coronavirus

Instructions:
Before you come in

Instructions for your appointment

- Arrive 15 minutes before your scheduled appointment time.
- Bring drivers license and insurance card.
- Don't get vaccine on an empty stomach: Some who have arrived for their vaccine on an empty stomach have experienced nausea.
- You must wear a mask to the vaccination appointment.
- Don't be a vaccine no-show. Every drop of this vaccine is needed. Please keep your appointment or cancel 24 hours in advance by emailing vaccinancel@genesishealth.com.
- The vaccination is a shot in the arm and takes just seconds to administer.
- Each person is required to stay for 15 minutes in the exam room after administration to be observed for any initial side effects.
- Vaccinations will be charted in your medical record and exported to the state databases IRIS and ICARE for tracking.
- The second dose appointment: Your second dose will be scheduled during the first vaccination appointment based on CDC and vaccine manufacturer guidelines.
- Vaccination MUST be at same location where the first dose was administered for state COVID vaccine tracking.
- COVID-19 vaccines are not interchangeable, and a total of two doses by the same manufacturer will be needed to complete your vaccination.
- Vaccine preference is not available. It is not known how much vaccine Genesis will receive and from which manufacturer, so we are unable to offer a vaccine preference.
- If you have an adverse reaction, please seek medical attention from your PCP or Convenient Care. The vaccination clinics will have first aid care available, including EpiPens®. In case of an emergency, 911 will be called.
- We recommend you still mask up and social distancing after receiving the COVID vaccination as the vaccine doesn't guarantee complete immunity, you might infect others with COVID-19, and it will take time to achieve herd immunity. <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/faq.html>
